

## Instructions for VIRTUAL VISUALS by TODD POWELL *photography*

1. If possible, remove existing art from the desired space.
2. Tape a piece of 8 1/2" x 11" paper to wall where photograph will go. This is used as a measurement for sizing the piece. Other measurements such as mantle, headboard, sofa lengths are also helpful.
3. Take a photo of the space head on (not at an angle) and send large jpeg to [tracy@toddpowell.com](mailto:tracy@toddpowell.com).
4. Include any information such as image numbers that you are interested in (most are found on our website - [toddpowell.com](http://toddpowell.com)). Also, it is helpful to know how you would like the piece finished - traditionally with mat and glass, laminated with frame, or laminated without frame (frameless float).
