## Technical Data Sheet

---

Do you have a shoebox full of family photos you would like to digitize? Robin Shoebox Scans are an inexpensive way to digitally scan large quantities of photos from 2x3 up to 8.5x11. These scans can be used to make same size prints or enlarge slightly. They can also be used for digital slide shows.

### What are Shoebox Scans?

- Images are scanned at 300 or 600 ppi and saved as J-peg or Tiff files.
- Shoebox scans are inexpensive scans and are not intended to be used for critical uses. We offer higher quality scans if your work requires more precision.
- Includes rotating scans for correct orientation at no extra charge.
- We will improve color when possible at no extra charge.
- Files are given sequential numbers. We do not custom name files. If you organize your photos into groups, we will place each group in its own folder on the CD.
- If you have information written on the back of the prints, we can scan both sides for slight additional cost. To make it easy to keep track of the information, files will be given the same number with the front having an "A" after it and the back having a "B" after it.

### What you should give us

- Images should be grouped into similar sizes.
- If you would like them in a specific order, please place them in the order you would like them scanned and tell us to keep them in order.
- Do not include any images that are brittle, torn, have adhesive on them, or have dog eared corners, as these may get caught in the scanner and might be damaged.
- Photos must be in stacks or folders. Photos in books, laminated photos, or mounted photos cannot be done as Shoebox scans, but can be scanned as flatbed scans. For critical color or high resolution, we recommend our high-resolution digital capture scans.
- Sizes must be no smaller than 2.5"x3.5" and no larger than 8.5x11
- **DO NOT USE THIS SERVICE FOR EXTREMELY VALUABLE ORIGINALS.** We always handle your photos with care, but this is an automated process and accidents can happen.

### Prices

	First 100 Originals	Additional Originals
300 PPI	49.00	0.39
600 PPI	59.00	0.47
Scan both sides	61.25	0.49
