## **PHOTOGRAPHY RESUME**

### **EDUCATION & INFLUENCE**

Practically born with a camera in her hands, Karen grew up with names like Brownie, Instamatics, Pentax, Minolta always within reach. She focused her college studies upon a degree in Fine Art Photography until 1974, when health impacts from darkroom chemicals made completion impossible.

She never stopped photographing however; documenting her experiences throughout her life and professional disciplines of equestrian sports, figure skating, dance, acting and professional voiceovers - even though the lab was off-limits. In 2009, her first pro digital camera in hand, Karen jumped back into the field and found a tremendous following for her landscape photography and never looked back.

Influenced by photographic masters such as Edward Weston, Ansel Adams, Paul Caponigro and Minor White for their composition and use of tones; Karen is equally inspired by the landscape masters of painting for their magical use of light. Both shaped her education and the methods applied to her own photography today.

### **STYLE**

Karen's style is all about The Story, using exquisite natural light to express the Spirit of her subjects. The work is currently 100% digital through post-production, meticulously created in rich tones and depth through multiple layers of construction. She is known for her breathtaking use of color; lush and full. She likens it to the heightened reality she experiences when a sense of Awe washes over her, announcing it's time to press the shutter.
