35mm Negative Scans

- All scans are individually cropped so that there are no edges showing or subject matter cropped out.
- General color corrections are made – further corrections may need to be made prior to printing.
- All images are individually checked for spots and corrected. We do not remove spots caused by dirt that is stuck to the slide. Spots resulting from dirt stuck to the film can be cleaned for an additional charge. Please note that you would like this done when placing your order.
- We offer four different scan resolutions depending on file size needed. (See chart below.)
- Images can be saved as J-peg or Tiff.

If film is in strips and all images are scanned see the discounted Strip Scan price.

Medium & Large Format Film Scans

Medium format scans are from roll films larger than 35mm, generally 120. 120 film falls into four sizes measured in cm.: 4.5x6, 6x6, 6x8, and 6x9.

Large format scans are from 4x5 and 8x10 inch film.

- All scans are individually cropped so that there are no edges showing or subject matter cropped out.
- General color corrections are made – further corrections may need to be made prior to printing.
- All files are individually checked for spots and retouched out. Spots caused by dirty or damaged film are not corrected unless we are requested to do so. There is an additional charge for this service
- We offer different resolutions depending on file size needed. (See chart below.)
- Images can be saved as J-peg or Tiff.
