This abstract artwork features a vibrant, layered background of blue, green, and red washes. Stylized raindrops in yellow, orange, and teal are scattered throughout. Two rainbows are visible: a large, multi-colored arc at the top and a smaller one at the bottom left. Black ink drawings of plant-like forms with long stems and feathery tops are positioned in the center and bottom right. Dashed lines suggest movement or paths across the composition.

ARTIST BIO

HI! I'M EMILY

I'm a painter, illustrator & mapmaker best known for joyous artworks and maps celebrating the magic of the natural world and reverence for the great outdoors. I always go back to art and creating as comfort. Observing nature and its creatures - seeing the language of a universe that is alive - is constant inspiration.

I grew up in southern Illinois and now make it my home base while in a nomadic phase of frequently traveling about. Forever on the lookout for coffeeshops, bakeries & bookstores, if I'm not covered in paint I can usually be found baking cakes, listening to the blues & growing things in the garden for my beehives.
