ART NEW YORK

“My art thrives at the intersection of art and science, where abstractions bloom with botanical, aquatic, and microscopic motifs. Inspired by the patterns and mysteries of both nature and the cosmos, I aim to evoke a sense of wonder and appreciation for the repeating cycles, symbiotic relationships, and regenerative forces that shape our universe.”

“Blending elements of the real and the imagined, I create a colorful world that is both familiar and strange, inviting viewers to contemplate the interconnectedness of all things.”
